Our property situated at 189 state highway one has had the land levels increased around the house when we built a new house in 2021 . They were done by survey and engineers, the land raised to above the coastal flood hazard inundation level. These levels need to be reflexed in the plan in the increased height of the land which is similar to the buildings on the property as stated in the submission s605.003 T & T comments. This flood mapping has been updated since 2021 by NRC in particular with the NRC Awanui flood protection scheme improvements and re directing of flood flows more down the whangatane channel from Kaitaia. Do I need to supply the survey data to you
??? regards Fiona King
