

Lay-Evidence re Submission S-249

Original Evidence as attached to Submission S-249

Attachment 1
**Mangōnui and Rangitoto Peninsula Heritage Area ('MRPHA') - Part B Overlay on
Rangitoto Peninsula**
Bases of Objection

It is inappropriate and contrary to Part 2 of the RMA for the MRPHA-Part B overlay proposed for the eastern side of the Mangonui Harbour ('RPHAB') to encompass the whole of the Rangitoto Peninsula ('RP') and in particular to encompass the three Sites we own (as listed in Annexure A), for the following reasons:

Reason No. 1:

The rationale for, and the areal extent of, the RPHAB was based on inadequate and incomplete expert evidence and analysis.

The 'Historic Heritage & Heritage Area Overlay Section 32 Report' associated with the PDP ("**S.32 HR**") states:

*"The Plan Heritage assessment reports were completed in June 2020 and **have informed the section 32 evaluation.**"*¹ [emphasis added]

The Plan Heritage reports being:

- 'Plan.Heritage Stage 1 Background Report' (Attachment 2 to the S.32 HR) referred to here as "**PH1**", and
- 'Plan.Heritage Stage 2 Rapid Assessment Reports' (Attachment 3 to the S.32 HR) referred to here as "**PH2**".

The work undertaken by the Plan Heritage consultants for the FNDC as documented in the PH1 & PH2 reports was intended to be preliminary and not used as the definitive basis for establishing policies and rules in a Notified District Plan (DP). The reports include many comments that support this contention, including in PH2:

- *"For each Historic Heritage Area the following is presented• High level management/ risk information, which requires further ground truthing and stakeholder engagement."*²
- Under the Chapter headed: "**METHODS FOR FURTHER ASSESSMENT**":
"The evaluations in this report are based on high-level research and a single site visit, so further assessment is required. In particular, there has been no stakeholder engagement to date. The following are preliminary recommendations in terms of developing the methodology, fieldwork and

¹ S.32 HR, p15

² PH2, p4

stakeholder engagement to finalise the evaluations.”³ [This statement was followed by three pages detailing what further work was recommended], and

- *“Further work is required to define ‘sub-areas’ • This will include review of design guidance for those areas; • Historic Heritage Management Plans should be prepared which detail management responses and specific policies for heritage areas and sub areas”⁴,*

We understand none of the recommended further work has been undertaken or commissioned by the FNDC (or if it has, it has not informed the S.32 HR or the Heritage Area Overlays chapter of the Notified PDP).

We understand the Auckland based consultants never ventured onto the RP during their single visit to the district, but only looked at it from across the harbour. They never contacted any of the RP owners, some of whom (including ourselves) have accumulated substantial historical information relating to the physical and cultural history of this land.

We identified and documented a number of untrue, misleading or questionable assertions in the PH2 report and wrote a letter to Plan Heritage in September 2020 on behalf of ourselves and our neighbours, the Ferguson family⁵ (included here as Annexure B) asking Plan Heritage to either evidence their assertions or retract them. We understand Plan Heritage shared that letter with FNDC Planning Department staff. We received no response to that letter from either Plan Heritage or FNDC, from which we conclude all of the matters we listed in that document represent valid deficiencies of the PH2 report, and hence deficiencies of the S.32 HR evaluation that was basis for the RPHAB.

Reason No.2:

The boundaries for the RPHAB do not adhere to any self-consistent logic.

A HA must clearly encompass scheduled **Heritage Resources** (as listed in the PDP) and any other significant concentrations of ‘**Historic Heritage** natural and physical resources’ (per the relevant definition in the RMA) that relate to each other, and not include areas which do not have a reasonable concentration of such resources, or conversely not arbitrarily exclude immediately neighbouring areas that do contain a high concentration of such resources.

Neither Heritage New Zealand Pouhere Taonga (HNZ) or local Iwi/hapu were consulted by Plan Heritage or the FNDC in relation to where the boundaries should

³ Ibid, p248

⁴ Ibid, p252

⁵ Letter signed by Ian Palmer to John and Adina Brown, Plan Heritage Ltd. Subject: ‘Plan Heritage Ltd Reports prepared for the FNDC’, dated September 27th, 2021

be placed prior to the boundaries of the RPHAB that appear in the Notified PDP being fixed.

HNZ (who supported the concept of combining areas of colonial European built heritage and pre-contact Māori heritage in a single HA) in their submission on the draft PDP suggested in relation to the entire MRPHA that:

“... the boundary needs to be extended to include the entire harbour and associated adjacent ridge line perimeter”⁶.

This would include, inter-alia, the land to the west and north of Hihi including the Whakaangi maunga. While we don't agree with HNZ's premise of combining the two types of heritage (as discussed below under Reason No. 4), what they proposed based on that premise is logical given that the distribution of known Māori archaeological sites and Sites of Significance to Māori are more concentrated on the lands that HNZ's proposed extension would cover, as compared to the RP⁷. HNZ's feed-back was not acted on by the FNDC as the RPHAB boundaries first proposed by Plan Heritage were not subsequently changed.

In response to a Local Government Official Information and Meetings Act (LGOIMA) request, the FNDC advised⁸ in relation to the MRPHA it had only consulted with two Iwi organisations (corresponding with the two listed as a. & b. under Reason No. 4 below). It was also stated in that LGOIMA response to a request for “A list of the issues or questions put to (or intended to be put to) [such organisations]:

“The issue to be explored with these representative organisations is the inclusion of Māori heritage resources in the draft heritage areas”.

This response indicates that the question of what land should (or should not) be encompassed by the MRPHA on account of its Māori cultural or heritage associations was not canvassed with anyone representing tangata whenua. No additional Heritage Resources have been listed for the RP in the Notified PDP versus the draft, suggesting that those consulted didn't propose any.

This is perhaps not surprising, as there is a paucity of regionally significant Māori archaeological sites or Sites of Significance to Māori, or any other resources that could legitimately be defined as Historic Heritage on the RP, at least wrt our RP Sites. By contrast, slightly further to the east on Māori Waiaua land and the Whakaangi maunga there is a high concentration of such Historic Heritage resources.⁹

The Rangitoto Pa site to the west of our RP Sites (on the FNDC administered ‘Rangitoto Recreation Reserve’, aka ‘Allotment 71 Parish of Mangonui East’) is a

⁶ Letter signed by Bill Edwards, HNZ's Area Manager Northland, to the attn of FNDC's Greg Wilson, Subject: 'Feedback of HNZ on the Draft Heritage Areas in the Far North': dated October 26th, 2021, p6

⁷ As documented in: 'Northland Conservancy Historical Series No.6 "An Archaeological Survey Of Whakaangi, Doubtless Bay"', J. Robinson for DoC, 2007

⁸ LGOIMA response by email dated October 22nd, 2022 addressed to Ian Palmer from FNDC's solicitor Erica Cooney

⁹ For example as documented by Robinson *ibid*.

significant site, however the RPHAB appears to have been extended from that site east across our Sites to encompass a purported Māori 'Cliff Pa' site (NZAA O04/17) supposedly located to the east of our land on our neighbour's Site (Lot 1, DP91523). We understand that this purported Pa site is unknown to the owner of that Site, who has owned that site for some 40 years. Our above referenced September 2021 document gave evidence that the purported Pa site is non-existent. Possibly it was wiped out by the large slip that clearly has occurred in that area many decades ago, or by the earthworks associated with the establishment of the Hihi township. Certainly no one has been able to reliably define its location. (We invited HNZ's James Robinson to visit the area in September 2021 to clarify the matter, but that invitation was not taken up).

There are other inconsistencies with the proposed MRPHA, including its exclusion of the area known to be the site of historically important Māori flax workings on the Mangonui town side of the harbour.

Reason No.3:

It is inappropriate to combine areas featuring colonial period European built Historic Heritage resources with areas featuring pre contact Māori Historic Heritage resources in a single HA.

We concur in principle that both colonial period European built heritage and pre contact Māori heritage (particularly archaeological features and identified Sites of Significance to Māori) are equally deserving of protection. However, combining the two disparate types of Historic Heritage in a single HA is highly problematic, particularly in this region, having regard to the discordant relationship between the tangata whenua and the colonially settlers and government authorities in this area in the 19th and early 20th centuries¹⁰.

Combining the two disparate types of Historic Heritage leads to ambiguities as to what heritage attributes or heritage 'stories' are intended to be preserved, encouraged or 'honoured' across the RPHAB. For example, is building a colonial style dwelling in the style and scale of the kind being protected in the Mangonui township on our RP Sites (included in the RPHAB on account of their pre-colonial Māori heritage features) to be supported by the consenting authority, or is it to be opposed as an affront to tangata whenua?

In response to a query as to the requirement to consult with tangata whenua in relation to related Resource Consent (RC) applications (which could for example be an application to construct a European colonial style residence on RP land), the PDP team response¹¹ was:

"At this stage there is no mandatory requirement in the Proposed District Plan requiring consultation with tangata whenua in relation to resource

¹⁰ As for example documented in the Waitangi Tribunal's 1997 published 'Muriwhenua Land Report'.

¹¹ Email from FNDC's Liz Searle, Policy Planner, to Ian Palmer, October 10th, 2022

*consent applications. I would however refer you to TW-P6 in the tangata whenua chapter which outlines matters to consider when assessing applications for land use and subdivision that may result in **adverse effects on the relationship of tangata whenua with their ancestral lands**, water, sites, wāhi tapu and other taonga. Depending on the consent being sought and/or site-specific matters, consultation is regarded as good practice and **it may be requested by the resource consents team.**” [emphasis added].*

Which clearly indicates such consultation is to be expected for RC applications where the land concerned has been included under a HA overlay on account of Māori Historic Heritage and/or cultural value reasons, as is the case for our RP Sites.

We also note that FNDC planners considering subdivision RC applications in HA overlay areas (where such activity is to be classed as “Restricted Discretionary”) are to have particular regard to such tangata whenua consultation feedback¹².

The Accidental Discovery protocol (HA-S3) states in part [with emphasis added]:

*“Within 24 hours of the discovery the owner of the site, tenant or the contractor must: inform Tangata Whenua if the discovery is an **archaeological site**, Māori cultural artefact, or kōiwi.”* [Noting archaeological site is not a defined term in the PDP so presumably it equates to the definition in the Heritage Act which is very broad], and:

*“**No works shall recommence until the discovery area is inspected by the relevant authority or agency, this shall includeIf the discovery is of archaeological material other than evidence of contaminants, a site inspection for the purpose of initial assessment and response will be arranged by the Council in consultation with Heritage New Zealand Pouhere Taonga and appropriate Tangata Whenua representatives**”*

Tangata whenua consultation for proposed or approved activities in the RPHAB area is highly problematic for a number of reasons, including:

- 1) The overlapping and competing claims of mana whenua over the RP land as between at least three disparate ‘tangata whenua’ groups, being:
 - a. The Ngati Kahu ki Whangaroa Iwi¹³,
 - b. The hapu of Ngati Ruaiti, Matarahurahu and Ngai Takiora who affiliate with the Ngati Kahu Iwi and its representative body ‘Te Runanga-a-Iwi o Ngati Kahu’(TRINK)¹⁴, and

¹² per rule SUB-R13, Matters of discretion item d.

¹³ Ngāti Kahu ki Whangaroa are said to exercise kaitiakitanga for the purposes of the RMA based on the Area of Interest agreed between Ngāti Kahu ki Whangaroa and the Crown in the Deed of Settlement signed on 18 December 2015 (which includes all of the RP); refer: <https://www.tkm.govt.nz/iwi/ngati-kahu-ki-whangaroa> .

¹⁴ Refer Professor Margaret Mutu et al’s 2017 book ‘Ngati Kahu, Portrait of a Sovereign Nation’, Map 8 re the Rohe of listed hapu (which includes all of the RP);

- c. the largest Ngati Kahu hapu Te Paatu and their associated Kauhanga Trust that do not affiliate with TRINK¹⁵.

Having to transparently approach such multiple groups all claiming to be the relevant tangata whenua, or the Iwi/hapu who has mana whenua over the land in question, will unnecessarily aggravate animosities and contribute to community disharmony. Any RC feed-back is liable to be inconsistent or contradictory.

- 2) The representatives of such tangata whenua groups that are expected to review such RC applications or be involved in site inspections and respond to associated consultation requests are not resourced to do so, leading to either no well-considered responses and/or a tendency for informal payments to be expected/made to obtain feed-back supportive of the landowner's plans,
- 3) It will encourage, and likely result in, negative responses on account of long standing (and well founded in our view) grievances as to the way the land was originally alienated from Māori in the mid-19th Century¹⁶.

How the FNDC's planners should weigh-up such problematic consultation feed-back is ill-defined in the PDP and highly problematic in itself.

The latter point 3) listed above, risks undermining the key principle on which the New Zealand 'Torrens' system of land titling is built; that being the pivotal concept of Indefeasibility of Title¹⁷. The interests of the current private owners of land whose title is guaranteed by the Crown should not be prejudiced by matters concerning grievances related to '*the relationship of tangata whenua with their ancestral lands*'. These are matters as between the aggrieved parties and the Crown; the Crown being the party responsible for how it alienated Māori from the land in the mid-19th Century. The legislative underpinnings of the Historic Heritage chapters of DPs (ie Section 6(f) of the RMA) does not support allowing such sensitive Māori-pakeha relationship issues to be drawn in to Historic Heritage planning (for the reasons espoused in Reason No.4 below).

The most tangible legitimate potential concerns of tangata whenua, related to protection of pre-colonial archaeological sites and Sites of Significance to Māori, are already addressed fully by other means; including other (non-Heritage) sections of the PDP and by the Heritage New Zealand Pouhere Taonga Act 2014

¹⁵ Refer the map associated the 'Marine and Coastal Area (Takutai Moana) Act 2011' application for Protected Customary Rights (PCRs) and Customary Marine Title (CMT) by the Te Paatu/Kauhanga affiliated application group "Nga Hapu o Ngati Kahu" (application Ref No. CIV-2017-485-268), (which encompasses all of the RP);

¹⁶ As enunciated in 'Ngati Kahu, Portrait of a Sovereign Nation', (ibid). Refer particularly to Table 11, p308, that lists Rangitoto as one of the "Lands to be relinquished in full and final settlement" of Ngati Kahu's unresolved Te Tiriti o Waitangi grievances claim.

¹⁷ For explanation of Indefeasibility of Title and its importance refer: <https://legalvision.co.nz/property-and-leasing/indefeasibility-of-title-new-zealand/>

(‘Heritage Act’). We note in this regard from our own experience that the FNDC routinely asks for HNZ comment on RC applications associated with RP land and the FNDC routinely reminds applicants of relevant provisions of the Heritage Act and the current Accidental Discovery Protocol in its responses to RC applications, without the land needing to be subject of a HA overlay.

If having received feed-back from some or all of multiple disparate tangata whenua groups, it is likely in many cases that the FNDC planners will subsequently make decisions that don’t accord with some or all of that feedback, owing to the likely problematic issues with such consultation and feedback as discussed above, and owing to the RMA strictures that the planners must abide by. This will only add to the prevailing antagonism between many parts of Maoridom in this district and the FNDC.

Reason No.4:

Designating an area of land as a ‘Heritage Area’ based on its Māori cultural connections and/or landscape attributes amounts to ‘Double Counting’ contrary to the RMA according to Environment Court and High Court rulings.

The RMA requires DPs to address certain *‘matters of national importance’*, including:

- protecting natural character of the environment and landscapes per RMA Sections 6(a) and 6(b),
- Māori cultural issues and values per 6(e), and
- Historic Heritage resources per 6(f).

The National Planning Standards (NPS)¹⁸ requires these matters to be addressed in their own specific chapters of a DP where all of the policies and rules related to these matters must be located. For example, the NPS states¹⁹[with emphasis added]:

“If the following matters are addressed, they must be located in the Natural features and landscapes chapter:

a. identification of features and landscapes that are outstanding, significant or otherwise valued

b. provisions to protect and manage outstanding natural features and landscapes

c. provisions to manage other valued features and landscapes.”

¹⁸ Ministry for the Environment. November 2019. “National Planning Standards”. Wellington: Ministry for the Environment. (as updated February 2022): <https://environment.govt.nz/publications/national-planning-standards/>

¹⁹ *ibid*, p34

The Environment Court (EC), and the High Court (HC) on appeal against EC rulings, has, in several key cases, ruled against, or cautioned against, ‘**double-counting**’ (their term) either Māori issues or natural character/landscape issues under the umbrella of Historic Heritage protection.²⁰ The EC & HC have also cautioned against the use of the terms such as “heritage landscape”, “cultural landscape” & “cultural heritage landscape” (here referred to collectively as “HLs”) in regards classifying wide areas of land as Historic Heritage resources.²¹ The courts have indicated that a high threshold test needs to be passed in order for a HL to be protected under the authority of Section 6(f). Judge Whiting R in ‘Clevedon vs Manukau City Council’ stated [with emphasis added]:

*“Because of the strong direction in the Act to recognise and provide for matters of national importance, decision makers under the Act should not hold that a landscape qualifies as a **cultural heritage landscape** under Section 6(f) **without adequate expert evidence of a probative nature**. There requires **sufficient intensity of heritage fabric woven into the landscape** to warrant the application of Section 6(f).”²²*

This is what we refer to below as the “Whiting Test”.

It is very pertinent that in ‘Guyco vs FNDC’ the EC ruled (in part) against the FNDC and required the then proposed ‘Paihia Mission Heritage Area’ (that was already of modest dimensions compared to the new HAs in the PDP), be shrunk to only encompass land in close proximity to specific Heritage Resources²³. The PDP, by proposing to extend HAs, including the RPHAB, to encompass land far away from any listed Heritage Resources or any other significant Historic Heritage resources (and specifically proposing to capture the RP land in the RPHAB on account of it being ‘heritage landscape’) is a direct affront to prior EC and HC cautions and rulings.

It is clear from the PH2 report (in which the word *landscape(s)* appears 138 times) and comments in the S.32 HR (in which the word *landscape(s)* appears 52 times) that the basis for defining the RPHAB as Historic Heritage to be protected under the legislative authority of Section 6(f), is due to its purported Māori cultural associations and visual amenity landscape attributes. This amounts to ‘double counting’ unless it can be demonstrated that the “*landscape qualifies as a cultural heritage landscape*”, per the above referenced Whiting Test; however, it fails this test on two counts, as explained below:

²⁰ For example, see:

[2009] NZEnvC 103_Maniototo Env Soc et al vs Central Otago District Council And Otago Regional Council, at [208],

[2010] NZEnvC 211_Clevedon et al vs Manukau City Council, at [185] and [193],

[2012] NZEnvC 120_Wallace vs AKL Council, at [65], [66] & [67],

[2014] NZEnvC 129_Guyco and PHPSS vs FNDC, at [88] and Outcome at [101], and

[2014] NZHC 3328_TW Reed Appeal vs FNDC, at [49], [50], [51], [95], [96] & [97]

²¹ For example, see: [2009] NZEnvC 103 *ibid*, [2012] NZEnvC 120 *ibid*, & [2014] NZHC 3328 *ibid* [49] & [50],

²² [2010] NZEnvC 211 *ibid*, [193]

²³ [2014] NZEnvC 129 *ibid*,

The assertion of the RP's Māori cultural associations derives from the PH2 report's comments regarding a purported high concentration of recorded archaeological sites on this land. However, the consultants failed to evaluate the location and nature of any sites relevant to our RP Sites, or even list them, stating²⁴: *"there are too many sites recorded on the Rangitoto Peninsula to record individually"*. In contrast, HNZ informed our planning consultant in March 2016²⁵ that there are *"10 archaeological sites recorded in the vicinity of your client's property"* and listed them all by their NZAA Site No.s. Our careful examination of the full site records for these 10 sites²⁶ (as summarised in Annexure C) reveals that only six and part of a seventh are located on any of our RP Sites, and almost all of those are located in fenced off bush areas that are protected by various (non-Heritage) PDP overlay rules and by (our applied for) Conservation Covenant, in addition to being protected by the Heritage Act. The sites are also of relatively low regional archaeological significance (typically disturbed shell middens and ground depressions related to remnant kumara pits) of the type ubiquitous over the Northland District. HNZ state²⁷ there are over 11,000 NZAA recorded sites in Northland. No doubt there are a far greater number of unrecorded sites of such low regional significance level as the ones on our RP Sites.

The only two genuinely significant Māori related sites on the RP are two Māori Pa²⁸, both on the harbour side of the RP. These are not on, or proximal to, our land and they are not listed in the PDP as either Heritage Resources or Sites of Significance to Māori. There are in fact no 'Sites of Significance to Māori' at all listed in the PDP in relation to the RP. The only listed Heritage Resource on the RP is a European colonial built heritage item being 'Butler's House'²⁹ on a neighbouring property, but that is not visible from our property and not proximal to any of our boundaries.

The valuable parts of our RP Sites, where development activity is at least practical, are our largely featureless cow paddocks. The NZAA listed sites that are to some extent located in our cow paddocks represent a very small fraction of that developable land. Therefore, our cow paddocks clearly cannot be defined as Historic Heritage resources as they do not meet the key arm of the Whiting Test; i.e. re having: *'sufficient intensity of heritage fabric woven into the landscape to warrant the application of Section 6(f)'*.

²⁴ PH2 report *ibid*, p226

²⁵ Letter from HNZ signed by James Robinson, Regional Archaeologist, Subject: "Archaeological values at Hihi Lot 1 DP322506; Lot 1 & 2 DP 391076; Lot 1 DP 204980; and Allot 79 PSH of Mangonui East", addressed to Emma Miller, Reyburn and Bryant, dated March 29th, 2016

²⁶ O04/58, O04/69, O04/447, O04/472, O04/473, O04/650, O04/651, O04/652, O04/653, and O04/973.

²⁷ Letter from HNZ *ibid*, p2

²⁸ The two Pa being: Rangitoto within the Rangitoto Recreation Reserve aka Allotment 71 Parish of Mangonui East and a Pa on Allotment 67 Parish of Mangonui East that some local kaumatua have suggested should be referred to as "Moehuri".

²⁹ "Butler's House" is listed in the PDP Appendix 3: Schedule Of Historic Sites, Buildings And Objects, as item No. 16 and is located on 'Allotment 1 Section 2 Village of Mangonui'.

The deficiencies identified in the consultant's PH2 report discussed under Reason No. 1 above, evidences that the Whiting Test is failed on a second count, i.e. the requirement that there be: *'adequate expert evidence of a probative nature'* in order to assert that the RPHAB land reaches the threshold of a *'cultural heritage landscape'*.

Therefore, the evidence evinces that our RP developable land (i.e. our largely featureless cow paddocks) are not Historic Heritage resources and therefore cannot be included within a HA overlay in the PDP.

Arguably, the FNDC's entire philosophy underlying its proposal to apply HA overlays over large areas of rural land in the Far North District for the first time, is in breach of the RMA (as interpreted by the EC) as in most cases it amounts to 'double counting' of the kind discussed above. This philosophical approach of wanting to protect landscapes and Māori cultural values under the guise of Historic Heritage protection by authority of RMA Section 6(f) is evidenced by numerous statements in the S.32 HR, for example: [with emphasis added]:

*"Heritage Area Overlays, are proposed to afford protection to areas within the district where there is an identified cluster of Heritage Resources and there is potentially a mix of Significant Natural Areas (SNA), Outstanding Natural Features and Landscapes (ONFL), Coastal Environment, Notable Trees and places of significance to various Māori iwi and hapū groups."*³⁰

and:

*"It is considered that the extension of the areas will protect the historic heritage, values and **landscapes** from inappropriate use, development and subdivision."*³¹

and:

"The table below outlines the provisions in the RPS that are directly relevant to Historic Heritage and Heritage Area Overlay chapters

*Objective 3.14 **Natural character, outstanding natural features, outstanding natural landscapes and Historic Heritage**"*³²

and:

"The key issues in these plans that have been taken into account in the preparation of the provisions for the Historic Heritage and Heritage Area Overlay chapters are as follows:

³⁰ S.32 HR, p8

³¹ Ibid, p5

³² Ibid, p11

- Including hapū and iwi groups in consultation of development plans and to recognise them as the kaitiaki of the heritage areas in their rohe (tribal territory);
- Avoiding earthworks, to protect wāhi tapu and sites of cultural and historical significance;
- Protecting mauri of coastal waters; and
- Recognising the importance of protecting cultural landscape³³.

and:

*“Disturbance of heritage resources have the potential to cause significant and detrimental short and long-term effects that are often associated with construction, development, land use and subdivision. These can result in adverse effects such as damage to **cultural areas, values, landscapes** and resources.”³⁴*

and (in specific reference to the MRPHA and the perceived risk if the RPHAB was not extended over the entire RP):

*“No protection of Rangitoto Peninsular and **consideration of the Sites of Significance to Māori and Outstanding Landscape.**”³⁵*

In our case, where there are no Heritage Resources at all on our Sites, the only basis for extending the RPHAB over our Sites (and most of the neighbouring properties) appears to be the land’s purported environmental/landscape and Māori cultural values. However, these values and resources, in so far as they require protection and are not otherwise protected by other laws, must be given such protection in their own (non-Heritage) chapters of the PDP; and they are; hence the double counting.

Even the FNDC has determined that protecting ‘cultural landscapes’, if and when that becomes authorised and required by legislation that may replace the RMA, is problematic, as evidenced in its response to the Government’s ‘Natural and Built Environments Act’ exposure draft where it was stated³⁶:

“With the further introduction of cultural landscapes in a district known as the birthplace of the Nation and where Māori settlement first occurred, the majority of the district could be identified with those values. Protection of such resources need to be proportionate to the communities that are protecting them for the benefit of the nation.

It would appear that the FND is over represented in this regard and it would not seem equitable for the FND to be the part of the country ‘carrying the

³³ Ibid, p13

³⁴ Ibid, p14

³⁵ Ibid, p59

³⁶ FNDC submission to the MfE RE: “Far North District Council submission on the exposure draft for the Natural and Built Environments Act”, dated 3 August 2021, p5.

can' to protect these areas in perpetuity while other areas of the country do not."

Notwithstanding, the above expressed concerns, the FNDC appears to be 'jumping the gun' in endeavouring to apply protections for HLs (e.g. 'cultural landscapes') by way of its proposed HAs, even before such is authorised by legislation.

Reason No.5:

Justification for the entire RP land being subject to the RPHAB overlay was in part based on an erroneous premise regarding the land's involvement in historically significant colonial European industrial enterprises.

The S.32 HR states [with emphasis added]³⁷:

*"The Rangitoto peninsula is known for its archaeological values through **heavy involvement in the timber trade, its flax industry, and whalers and sealers in the late seventeenth century**, visible today in Butler House and the Whaling Museum on Butler Point."*

This is entirely untrue and/or misleading. There is no archaeological or historical written evidence that the RP was involved in either the timber or flax trades post 1840. These were significant industrial activities of the Mangonui region, however they were activities centred on the other (Mangonui town) side of the harbour.³⁸ Certainly, no whalers or sealers came to the area in the '*late seventeen[sic] century*'!

Butler House is a Heritage Resource directly associated with Captain William Butler's mid-19th C. whaling ship provisioning enterprise. However, Butler's commercial and domestic premises were constrained, at least initially, to two lots of four and one acres (1.6 & 0.4 hectares respectively) on Butler Point.³⁹

Butler and his family members and later assigns subsequently acquired additional land at Butler Point leading to the Butler Point estate of some 26 hectares, now owned by the Ferguson family.

³⁷ S.32 HR, p2

³⁸ Refer for example: "Mangonui Gateway to the Far North", Neva Clarke McKenna's most substantive documentation of the early colonial history of this area. See particularly commentary on pp 5,6,52 & 63 re flax industry and 6, 7 and 139 re timber industry.

³⁹ Refer Survey Plan dated August 14th, 1850 depicting the 4 acre and 1 acre lots that William Butler was Crown Granted that surrounded both his domestic and commercial premises. The original of this plan is extant in the NZ Archives file titled: "Case files [Thomas Ryan, Mangonui]" (OLC 403-407) and a copy can be accessed electronically per: https://ndhadeliver.natlib.govt.nz/delivery/DeliveryManagerServlet?dps_pid=IE57115166 (as File 2). These two lots remain today as: 'Lot 1 Section 2 Village of Mangonui' (re the 4 acres surrounding Butler House) and 'Lot 2, Section 2 Village of Mangonui' (located at the tip of Butler Point and which was granted to Butler for his "business purposes" according to other documents in the ibid file - there is some evidence to suggest Butler constructed a bond store on this latter lot).

Butler Point however is regarded locally as its own distinct locality, not ordinarily associated with the term 'Rangitoto Peninsula', whereas the Rangitoto Peninsula is a much larger area (of circa 60 hectares) almost entirely unconnected to Butler and his Butler Point historical activities or to the other historical activities ascribed to it in the above quoted S.32 HR passage.

Reason No.6:

The S.32 HR assessment did not evaluate the economic impact of imposing HA overlays over large tracts of land for the first time or assess the risk of not acting.

RMA S. 32 (2) requires that [with emphasis added]:

“An assessment under subsection (1)(b)(ii) must—

*(a) identify and assess the benefits and costs of the environmental, **economic**, social, and cultural effects that are anticipated from the implementation of the provisions, including the opportunities for—*

*(i) **economic growth that are anticipated to be provided or reduced and***

*(ii) **employment that are anticipated to be provided or reduced; and***

(b) if practicable, quantify the benefits and costs referred to in paragraph (a);

and

*(c) **assess the risk of acting or not acting** if there is uncertain or insufficient information about the subject matter of the provisions.”*

The FNDC's primary stated objectives for extending HA areas over additional land is the:

“protection from inappropriate subdivision, use and development”⁴⁰

Therefore, the intended result must be a reduction of subdivision, use and development. This clearly has an economic impact including a negative impact on growth and employment. Nevertheless, this key impact was not addressed in the S.32 HR, either qualitatively or quantitatively.

What is to be regarded as *“**inappropriate subdivision, use and development**”* is also not meaningfully defined. Many references are made to *“protecting heritage values”* but what that means in practical terms is left ill-defined. For example, for the RP land we own, would building a colonial European style dwelling be seen as compromising or honouring the heritage

⁴⁰ S.32 HR, p5

values of this particular land? Would subdivision to create additional new Sites and dwellings to provide for accommodating district population growth be regarded as compromising the purported heritage values of our cow paddocks, assuming it was in compliance with all of the non-Heritage provisions of the PDP?

In terms of assessing the risk of not imposing the HAs over all of the RP (as well as other additional HA areas), the S.32 HR did not give any evidence to demonstrate that *'inappropriate subdivision, use and development'* has been occurring in the areas concerned, or provide any evidence or reason to believe such inappropriate activity should be expected to any significant extent without the additional rules.

MfE Guidance on Section 32 evaluations⁴¹ emphasises the importance of *'defining the problem'* (i.e. what is currently going wrong that new rules might rectify). The word 'problem' appears 32 times in this context in that key guidance document, however it doesn't appear once in the S.32 HR report. The implied problem per the S.32 HR report is the absence of restricting rules. But creating rules simply because there aren't such rules already is not a valid reason if the absence of such rules is not proving to be deleterious. Essentially the new HA overlays and their associated rules represent a solution to a non-existent problem; or at least to a problem that hasn't been evidenced.

In conclusion, the FNDC has not evinced a valid case (in its S.32 HR or otherwise) for the RPHAB to encompass all of the RP, in particular to encompass the three Sites we own.

John and Adina Brown,
Plan Heritage Ltd

Plan Heritage Ltd Reports prepared for the FNDC

Dear John & Adina,

I'm writing to you on behalf of my neighbours, the Ferguson family of Butler Point (Jan who lives on the property and William who lives elsewhere) as well as my wife (Zeja Hu) and myself.

Collectively, we own about 100 acres of land on Butler Point/Rangitoto Peninsula. As you would appreciate this is a substantial portion of the land that the FNDC proposes to be subject to the 'Mangonui and Rangitoto Peninsula Historic Heritage Area' (MRPHA), being one of several Heritage Area (HA) overlays in their draft Proposed District Plan (PDP).

The FNDC has indicated that the MRPHA proposal, and particularly its proposed area, is as a direct result of recommendations in your (i.e. Plan Heritage Ltd) June 2020 finalised Stage 2 report which they have recently made public.

We consider ourselves principal 'affected parties' who should have been consulted on the content of your reports before they were made public or used by the FNDC to base its MRPHA proposal as published in a draft PDP.

We appreciate your report makes various recommendations and proposes additional professional work, however the FNDC have indicated their intent to Notify their PDP before the end of this year (at which point the relevant PDP rules become legally enforceable) and they have not indicated what if any of your recommendations and additional work will be undertaken before then, or at all. They have also thus far not proposed any changes to the Heritage Area (HA) policies and rules in the draft PDP, or to the proposed area of the MRPHA, despite receiving community feedback in May this year, urging changes and/or withdrawal of the MRPHA proposal. A new deadline of October 13th has been set for public submissions on the HA aspects of draft PDP and in order for our submissions to be properly informed we are seeking certain information from yourselves concerning your Stage 2 report. (We have also submitted Official Information requests to both HNZPT and the FNDC for information to inform our submissions).

Our concerns with the MRPHA proposal may well lead to formal submissions and objections after the PDP is Notified. If your report were to stand unamended and not superseded by a more in-depth report, then it's likely we would find ourselves publicly challenging some of the assertions in that report and pointing to what we see as deficiencies and inadequacies in the research work documented in it. This public forum

challenging seems particularly likely as the FNDC are now relying heavily on your report in publicly defending their HA proposals.

To avoid such public forum challenge and criticism, we'd like to give you the opportunity now to respond to our set of questions and issues as attached. If after considering our questions you were to agree that some or all of our concerns are valid and need to be resolved before the FNDC's PDP is Notified, we would be looking to you to advise both ourselves and the FNDC of your considered position on such matters.

We would also be happy to discuss our concerns with you if you thought that would be helpful and appropriate.

Ngā mihi,

Ian Palmer

Cc Jan Ferguson

William Ferguson

Zeja Hu

Plan Heritage Report Queries & Concerns

The Plan Heritage report titled: "Far North District Plan Review Historic Heritage Stage Two Rapid Assessment Reports" (PH S2) was made public by the FNDC in early September 2021. The list of queries and concerns below relates to that report's proposal for a Mangonui and Rangitoto Peninsula Historic Heritage Area (MRPHA) and in particular to the proposal that the MRPHA extend over the entire Rangitoto Peninsula and Butler Point.

1. PH S2 report uses the term "Butler Point" as if it is part of a wider area referred to as "Rangitoto Peninsula". It is questionable whether this is topographically correct. In any event, "Butler Point" is an area well known locally, and locals perceive it as an area distinct from such wider area which may or may not be correctly described as "Rangitoto Peninsula". There is a consequential potential for confusion in the proposed naming of the MRPHA. Has LINZ been consulted as to whether this is the most appropriate descriptor of the areas proposed to be encompassed by the MRPHA?

Notwithstanding the above concern, for the sake of brevity the abbreviation "RP" is used below to refer to all of the land on the eastern side of the Mangonui Harbour that is proposed to be within the MRPHA including, unless stated otherwise, Butler Point.

2. PH S2 (p227) refers to:

Cliff Pa (O04/17) located on Lot 1 DP91523

- Heritage New Zealand Pouhere Taonga (HNZPT) have advised that this is the same site as described in O04/57. Both NZAA Site records suggest the most recent site inspection was in the 1960s and neither records accurately define the location, but presumably it corresponds to the spine of the ridge that runs NE-SW from the Hihi sub-division; i.e. approximately coincident with present day Peninsula Parade. Local residents see no evidence of this site and suggest its remnants were probably destroyed as a result of the Hihi subdivision and/or the creation of the Peninsula Parade public road in the 1970s. This contention is supported by the fact that the site is not mentioned in Joan Maingay's "Mangonui Sites at Butler Point Mangonui" (DoC 1992) which she published following her extensive site surveys of the entire RP. In the NZ context, a Pa site is a very significant archaeological site, and to suggest one exists near the NE extremity of the proposed MRPHA area will be seen as a major justification for the MRPHA extending to that area, which is otherwise far away from any recognised Pa sites on the RP. Aren't the uncertainties associated with this site and the lack of reliable commentary as to its present-day condition (if it still exists in any meaningful sense at all) a very weak

basis on which to propose a HA extending over a substantial area of private land be formalised as an overlay in a Notified PDP?

3. PH S2 (p226) states:

- *"Note that there are too many sites recorded on the Rangitoto Peninsula to record individually"*
- Why could all such sites not be listed in the report? As written, this statement implies a plethora of sites at an extraordinary density compared to surrounding areas and the Northland region in general. This premise appears to be a primary reason for proposing the whole RP (but not areas beyond) being included in the MRPHA. Joan Maingay (1992) did list and describe all sites recognisable on the RP based on her fieldwork between 1986 and 1992. Maingay's list comprises two only Pa and 12 sites of lesser historic and archaeological significance (middens, pits, terraces, orchards etc). Robinson (2007 "An Archaeological Survey of Whakaangi, Doubtless Bay") documented a similar number of archaeological sites on the RP while documenting an order or magnitude more than this number in the adjacent, and culturally related, Whakaangi area. In terms of regional context, it is noted that there are over 12,000 NZAA recorded sites in Northland.
- Would it not have been more transparent to include some of the above context and perhaps also the attached NZAA Site viewer image which illustrates that the density of recoded archaeological sites on the RP is not extraordinary in this region?
- Is it not correct that the density of such NZAA recorded sites is as much a function of how much archaeological examination has been focussed on a particular area, as it is on the density of remnants of pre-colonial period land occupation? Noting that in the case of the RP, it has been the subject of intensive archaeological examination instigated in large part by its residents, particularly the late Lindo and Laetitia Ferguson (who were presented with a conservation award by DoC in December 1993 for their efforts) and Jan Ferguson who is a qualified archaeologist.
- Don't surrounding areas have a similar or greater density of NZAA recorded archaeological sites and more sites of significance to Māori, particularly re Whakaangi (as evidenced by Robinson 2007) and also Paewhenua Island?

4. PH S2 (p229) states:

*“Butlers House and Trading Station (Former) on the eastern side of the inner harbour contains a **range of** mid—late 19th century buildings and structures of national importance” [emphasis added]*

What is “a range of” referring to? Local understanding is that there is only one built historic Heritage Resource of national importance present on the RP and that is Butler House at Butler Point.

5. PH S2 (p230) states:

“Rangikapiti Pa and Rangitoto Pas are well-preserved examples of pre-European Headland Pa sites”.

- Doesn't this suggest both Pa are equally well preserved and are both in good condition and are well cared for? While Rangikapiti can fairly be regarded that way, (on account of a huge amount of volunteer work over several decades by the Friends of Rangikapiti group), the same cannot be said of Rangitoto, that has been entirely neglected by the party in whose custody it has been entrusted (i.e. the FNDC). The attached letter from NZHPT, which has been provided to the FNDC, attests to the issues that are compromising The Rangitoto Pa's integrity and preservation.
- Given that Rangitoto Pa would undoubtedly be the principal non-European historic Heritage Resource within the eastern portion of proposed MRPHA, shouldn't its relatively poor current condition and threats to its archaeological features be worthy of mention in the PH S2 report? Aren't HNZPT's recommendations, particularly wrt the urgent need for a Management Plan, relevant and noteworthy information, as is the fact that the site's administering body has ignored such advice and has for many years been in default of Section 41 of the Reserves Act 1977 for not having developed and then acted on such a MP?

6. PH S2 (p230) states:

“On the Rangitoto (Waikeke) Peninsula there are remnants of the original Kauri forests which attracted European settlers to establish a saw mill at Mill Bay, the timber trade fuelling the development of Mangonui in the 1880s.”

and (p233):

"..... Rangitoto Peninsula and Butlers Point include areas of surviving and regenerating Kauri forest and bush, which provide strong natural character and context to the shoreline, substantially unchanged for the last 200 years."

- What is the basis for implying the RP was known as "Waikeke"? It is acknowledged that some references (e.g. Maingay 1992 and Mogford "The Butler House, Mangonui 1847-1990", 1992), do suggest this association), however more recent research evidences that "Waikiekie" (sometimes 'Waikeke' and other derivatives) was the original Māori name of the area now known as Mill Bay and the associated headland between that bay and the Mangonui township. For example, see the attached Waitangi Tribunal (WT) published sketch map of Mangonui town circa 1840 overlain by approximate location of relevant OLCs.¹ (The confusion arose as Captain William Butler was granted a 3-acre block of land (per Deed 57H H1.37) on Butler Point in 1859 in exchange for the surrender of his derivative claim to some or all of Thomas Ryan's OLC 407 which was land Ryan had claimed on the town side of the Harbour i.e. at Waikiekie, now Mill Bay²).
- What evidence is there to assert that there are 'remnants of the original Kauri forests' on the RP? Local knowledge suggests there are none (but there are in the Whakaangi area on the other side of Hihi). The oldest known Kauri tree on RP is thought to be circa 60 yo (located on the Ferguson family's Butler Point estate).
- The RP and adjoining Hihi, Waiaua Māori land and much of the maunga Whakaangi was 'sold'³ by certain Māori chiefs to European sawyers, including James Berghan and Thomas Ryan in the 1830s, largely to facilitate harvesting of Kauri timber. Isn't it reasonable to assume the more accessible Kauri on this land, particularly the RP, would have been long gone when the mill at Mill Bay was constructed in 1880 (fully operational in 1901 and closed in 1915)? Shouldn't the limitations in these heritage relationships have been more clearly represented in the PH S2 report?
- What evidence is there that the RP shoreline is substantially unchanged relative to pre-colonial times? Consistent with the previous point, John Kinder's 1858 water colour painting of the RP (now in the Auckland City Art Gallery) shows a largely cleared landscape including the shoreline.

¹ Fig 29 from Professor Dame Evelyn Stokes (DNZM)'s 1997 Waitangi Tribunal published research report: "A Review of The Evidence In The Muriwhenua Lands Claims", Wai 45 P002 Vol1 p359.

² Direction of the Court of Land Claims signed by Commissioner Francis Dillion Bell, September 26th 1859; p81 from the file: "Thomas Ryan Mangonui [ACFC 16153 OLC1/17 OLC 403-407] Archives New Zealand The Department of Internal Affairs Te Tari Taiwhenua"

³ Waitangi Tribunal research papers suggest that the Māori 'sellers' didn't see these transactions as sales in a conventional European sense, but rather licences to occupy the land and share in the exploitation of the land's resources, which in the 1830s and 40s was principally timber.

- Most of the vegetation visible today on the RP is as a result of plantings by landowners since 1970 (when the Ferguson family acquired the Butler Point estate). These plantings, as well as the few pre-colonial aged specimens, will remain well protected by current planning laws/rules (and other proposed PDP rules), but more importantly by landowner veneration for such, with or without being subject to a HA overlay. Shouldn't the evidence of this long standing and ongoing manaaki whenua have been acknowledged in the report?

7. PH S2 (p232) states:

"The maunga Whakaangi is acknowledged as a place of great cultural significance to Ngati Kahu, and is closely related both visually and contextually to the historic heritage area."

So why isn't the maunga Whakaangi and the three associated historically important Māori land areas of Waiaua, Taemaro and Waimahana proposed to be included in the MRPHA? (Noting that these three areas were established as 'Native Reserves' in association with the Crown's historically significant 1863 'Mangonui Purchase').

8. PH S2 (p233) states:

*"Mangonui and Rangitoto Peninsula historic heritage area is of high significance historically, at the regional and national level, as a place of Māori settlement for at least 500 years prior to the arrival of the first Europeans. **There are associations with early waka landings**, and the pa sites on either side of the harbour have a strong associations with the Māori Rangatira Moehuri and his wife Rangikapiti."*

Which early waka landings is this a reference to and where are those landing places considered to be? Local understanding is that traditional Māori accounts of their early history place such waka landings at locations other than on the RP. The above quoted text is liable to be construed as suggesting such waka landings were on the RP, giving weight to the argument that the whole of the RP should be included in the HA.

9. PH S2 (p233) states:

"... the American whaler Captain Butler".

Captain William Butler was born in Dorset England in 1814.

10. PH S2 (p238) states:

*"...Rangitoto Peninsular /Butlers Point Area: includes [sic] **several** pa sites ..."*
[emphasis added]

Per Point 2 above, local knowledge only recognises two Pa on the RP: "Rangitoto" (O04/16 formerly N7/3) and the Pa on Butler Point (O04/56 formerly N7/70) of uncertain name (Robinson (2007) and Maingay (1992) suggest possibly "Moehuri" or "Hurimoe").

11. PH S2 (p238) states:

"Rangitoto Peninsular /Butlers Point Area: The proposed area covers largely [sic] undeveloped coastal and conservation land,..."

- What conservation land is this referring to? Local knowledge only identifies one piece of conservation land on the entire RP, that being the land that DoC grandiosely refer to as the "Oyster Point Conservation Area" (and locals refer to as the "DoC Strip").
- There is a 13-acre FNDC administered recreation reserve (Rangitoto Recreation Reserve) and some 'Paper' Roads and small esplanade strips on the RP, but almost all of the privately owned land has riparian rights.
- If a reference is to be made to 'conservation land'; i.e. to the DoC Strip (aka Oyster Point Conservation Area), shouldn't it be pointed out that this is a tiny (0.14 hectare) piece of inaccessible land not actually located at or on Oyster Point that has long been entirely ignored by DoC and currently supports an abundance of invasive non indigenous weeds? (It might also be mentioned that it is subject of a RoFR offer to Ngati Kahu as part of a proposed Waitangi Treaty settlement, notwithstanding its diminutive size and lack of apparent significance.).
- The RP is comprised of circa 20 titles on which there are at least seven dwellings and numerous utility buildings and other 'improvements', so does 'largely undeveloped' fairly convey this present-day reality?

12. PH S2 (p245) states:

"Deeds Plan C3 (North Auckland) (1840-1876) showing Butlers House and Trading Station, house and fields laid out".

- What is intended by the quoted date range and what reference is this based on?

- What evidence is there that Deeds Plan C3 shows either Butler House, the associated Trading Station or fields associated with Butler? (We see no such evidence from a close examination of a recently acquired high-resolution copy of Deeds Plan C3).
- Local knowledge of the cadastral history of this land indicates the Butler family never owned most of the land that is the subject of Deeds Plan C3, but rather that document is a set of sketches of the circa 1859-1863 subdivisions of land that the Crown sold to John Payne Lloyd in 1852 (see SO 1535B). These subdivisions and sales included 46 small sized 'town lots' (more clearly portrayed on SO 1535C1). These lots were never occupied as such and remained abandoned until claimed by a neighbouring landowner by adverse possession in the 1950s. Aren't the lineaments on Deeds Plan C3 purported to delineate Butler's fields etc, actually the cadastral boundaries of John Payne Lloyd's subdivided lots?
- Archival records including the attached survey plan⁴ show that the Government denied Captain Butler's request in 1850 to purchase 50 or 100 acres of RP land and instead agreed to sell just 5 acres to him (prior to a public auction of adjacent land). This first sale by the Government of land on the eastern side of the Mangonui Harbour comprised a four-acre lot on which Butler's house and buildings were already located ('Lot 1 of Section 2 Village of Mangonui') and the one-acre lot at the point ('Lot 2 of Section 2 Village of Mangonui'). The latter block was granted on the basis that it was required for Butler's 'business purposes' and probably was the site of a bond store as gazetted in 1851. Isn't this 5 acres of land the most deserving on the RP of being included in a District Plan HA and the rest of the circa 130 acres of RP land commensurately less deserving (except possibly for the two Pa sites referred above)? (It is acknowledged that Butler subsequently acquired additional land via public auction and a series of private conveyances between 1852 and 1867, leading to the circa 52-acre estate now owned by the Ferguson family).

13. PH S2 (p246) states (in relation to a 1948 aerial photograph):

*"Butler's trading post **and the small bach to the north** are the only settlement visible on the Rangitoto Peninsula, despite some early subdivisions."* [emphasis added]

Where and what is the 'small batch'? Local knowledge is not familiar with any 19th C. built structure on the RP other than Butler House. An extant stone cottage was built by Clifford Collins Edmonds in Te Kau Bay (on present day Lot 1 DP50149)

⁴ Thomas Ryan OLC file

which was occupied from 1951⁵, but nothing of that appears on any 1948 photograph.

14. PH S2 (p252) states:

"Further work is required to define 'sub-areas'.

This will include review of design guidance for those areas;

Historic Heritage Management Plans should be prepared which detail management responses and specific policies for heritage areas and sub areas; "

- Can you please provide examples of 'design guidance' and 'Historic Heritage Management Plans' so that we have a better understanding of what you are proposing.
- Would it be inappropriate for the FNDC to Notify its PDP with the MRPHA as per its draft PDP without completing the above proposed work and without having produced such proposed Design Guidance and Historic Heritage Management Plan documents (and without consulting with affected landowners and other relevant stakeholders on the content of such)?

15. PH S2 (p248) states:

"The evaluations in this report are based on high-level research and a single site visit, so further assessment is required. In particular, there has been no stakeholder engagement to date. The following are preliminary recommendations in terms of developing the methodology, fieldwork and stakeholder engagement to finalise the evaluations."

- Did the site visit on 19th Sept 2019 involve anyone visiting the RP?
- What engagement with and/or input from HNZPT helped informed what was written in the report?
- What additional work is required before the 'preliminary recommendations' for a MRPHA could be considered sufficiently robust and defensible to be included as a Heritage Area overlay in a Notified PDP?

⁵ Affidavit by Clifford Collins Edmonds 19th December 1955, Application 8230 p62-64

16. PH S2 promotes the concept that the MRPHA should embrace both built colonial period European Heritage Resources and pre-colonial Māori Heritage Resources and 'tell' their respective stories. The FNDC's resulting proposed MRPHA has a single set of conflated policies and rules which don't differentiate between areas included for one heritage reason or the other. Is this not problematic given the lingering sensitivities and unresolved issues associated with the early colonial history of this area? Numerous publicly available WT reports document a substantial volume of well-founded historic claims, which in the case of Ngati Kahu (other than Ngati Kahu ki Whangaroa) are yet to be settled. Ngati Kahu leadership have documented their sense of grievance associated with these well-founded claims in more passionate terms⁶. This history is seen by at least some in this community in terms of the area's development and growth of prosperity enjoyed by European colonial period settlers being at the expense of its Māori inhabitants. Given that background, to define a HA with this combination of Heritage Resources may lead to perverse outcomes. For example, consent conditions for buildings on areas of the RP included due to their pre-colonial Māori heritage associations, may be required to adopt European colonial architectural styles; arguably an insult to local Māori not an honouring of their heritage.
17. Shouldn't PH S2 have taken account of inter Māori Iwi sensitivities associated with the history of the RP in the early 19th C.? WT documents⁷ summarise primary source references that describe a decisive battle at the Rangitoto Pa in the early 19th C (possibly circa 1828). In this episode the Ngati Kahu occupiers are said to have suffered heavily at the hands of Ngapuhi attackers. It is assumed that this episode largely ended Māori occupation of Rangitoto Pa and its immediate surroundings and subsequently facilitated the 'sale' of this land by Ngapuhi chiefs to the European sawyers in the 1830s. The right to sell was highly contentious as between the leading Māori chiefs of the day representing opposing Iwi, which is an aspect that is still relevant in current proceedings in the WT⁸.

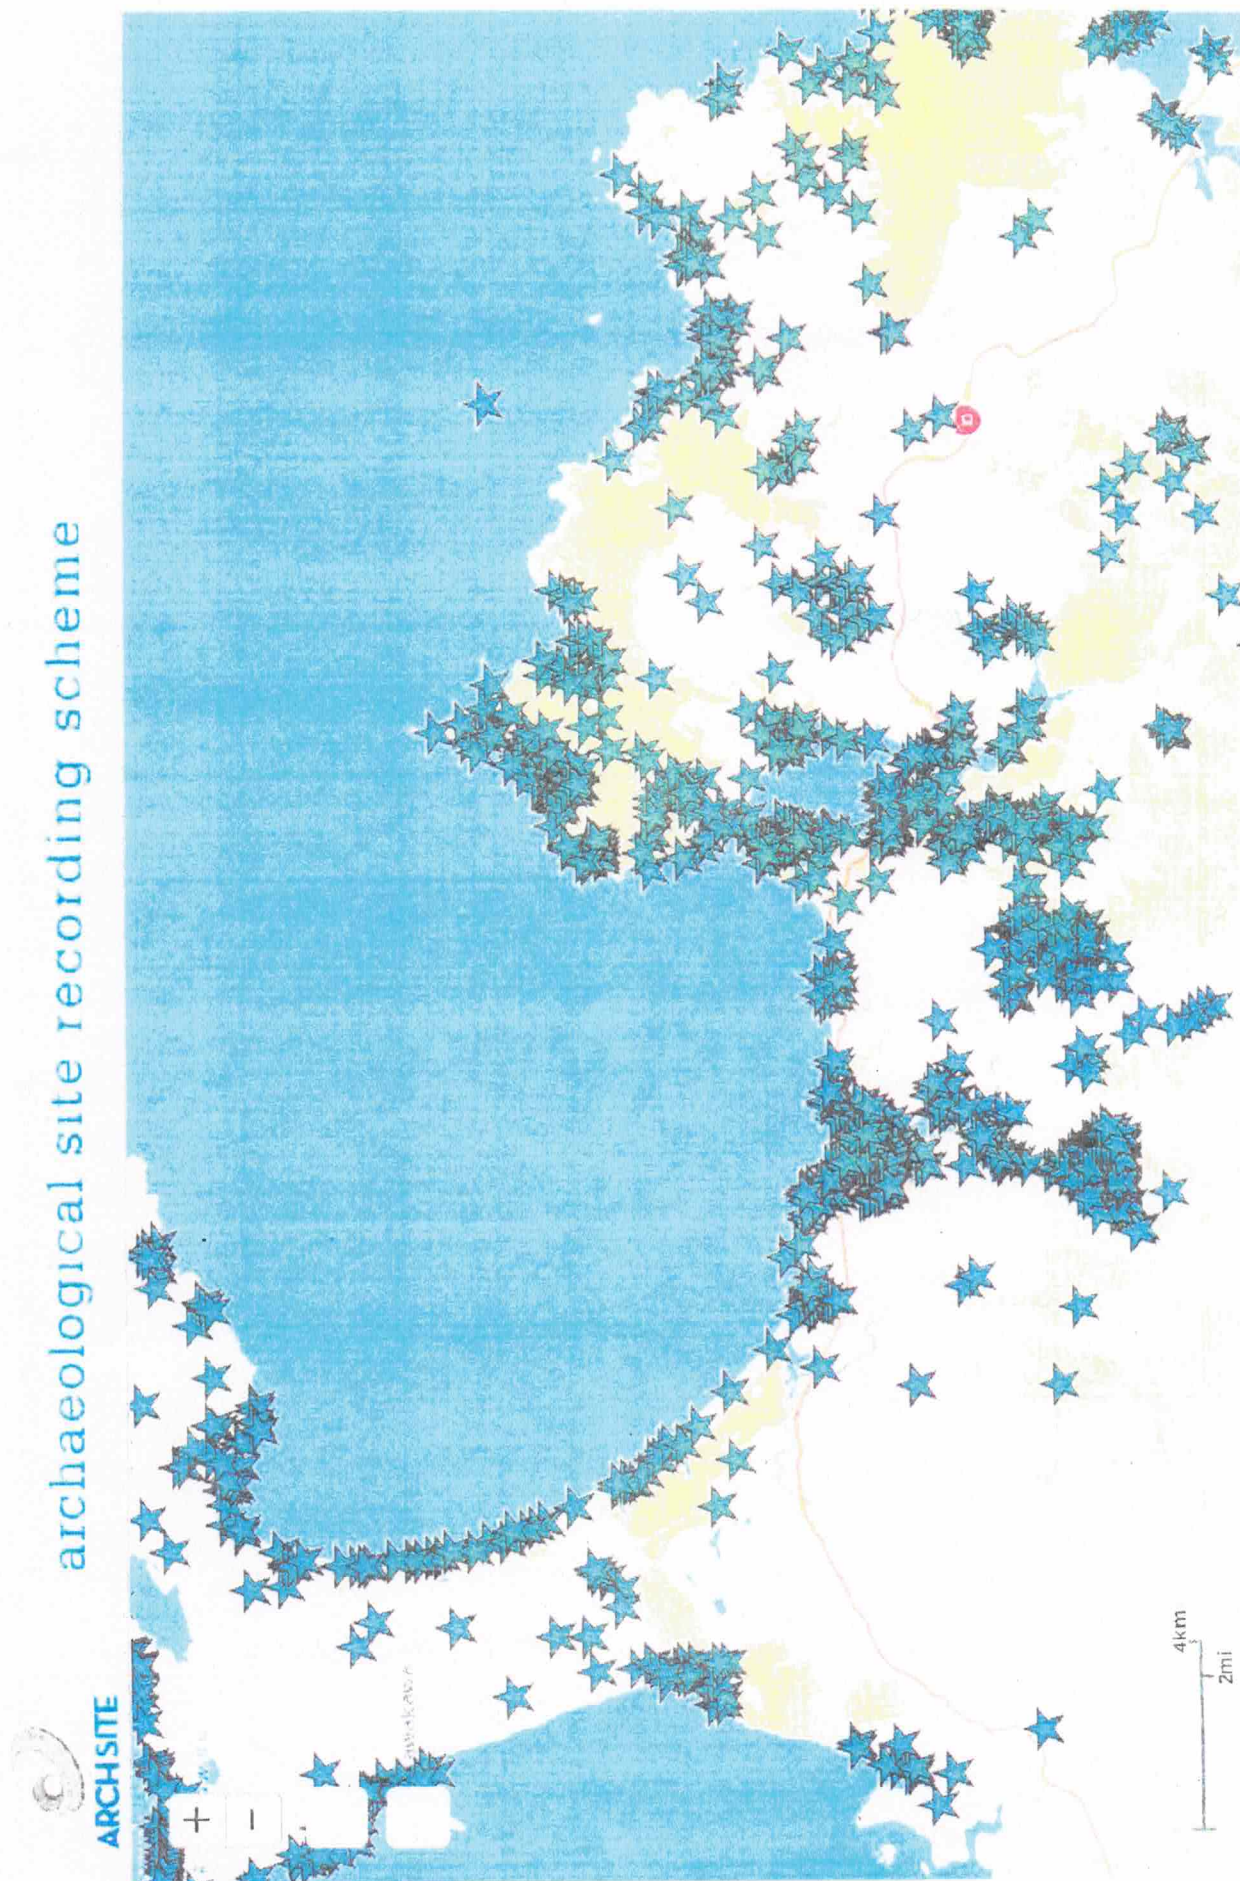

These are obviously sensitive matters that need to be carefully considered and addressed accordingly in consultation with relevant Māori representatives before finalising any MRPHA.

To Whom It May Concern

RANGITOTO RECREATION RESERVE: PROPOSED MANAGEMENT PLAN

Heritage New Zealand Pouhere Taonga is the statutory authority established under the *Heritage New Zealand Pouhere Taonga Act* (the Act) to promote the identification, protection, preservation, and conservation of New Zealand's historic and cultural heritage. Heritage New Zealand's powers extend to all land in New Zealand.

Rangitoto Recreation Reserve is managed by the Far north District Council. It covers 5.5ha and contains two archaeological sites; a midden (O04/973) and a prominent headland pa (O04/16). Rangitoto Pa along with Rangikapiti Pa located immediately opposite across the narrow harbour, effectively controlled access into Mangonui Harbour and the important horticultural resources of the Oruaiti River prior to European arrival in the area and the establishment of the Mangonui as a whaling fleet provisioning town. Today these two pa provide a special visual experience for tourists visiting the area.

At the request of the adjacent landowner I inspected the archaeological features of the pa in early 2020. The pa is one of the larger defensive pa sites in the area and covers much of the reserve with well-preserved terraces, a large 52 x 16m tihi platform and uses both steep natural slope and a deep ditch for defensive purposes (see Maingay plan Fig. 1 below). The site is traditionally significant to Ngati Kahu Ki Whaingaroa and is associated with a battle late in the prehistoric period.

In the last 30 years the grass cover on the headland has given way to weed shrubs and quick growing wattles that now obscure many of the pa features. These weed species will eventually cause significant damage to it through tree blow and root action. There is an urgent need to have a management plan to guide the removal of weed species, identify those areas that should be planted in native trees and set aside from planting the impressive earthworks of the pa that should be again covered in grass.

Heritage New Zealand has provided some initial advice to Mr Palmer as to how the archaeology of the pa could be enhance through weed control and focused grass and native tree replanting (see suggestions in Figs 2-4 below). However a professionally produced vegetation management plan is required that can incorporate archaeological and other values to enhance visitor enjoyment values. Should the Far North District Council agree to fund such a plan Heritage New Zealand is happy to continue to support this project by providing archaeological advice and expertise as required.

Yours sincerely,

Dr James Robinson
Archaeologist, Heritage New Zealand Pouhere Taonga

Fig. 1: Maingay 1986 sketch drawing of Rangitoto Pa (004/16)

Fig. 2: Maingay sketch plan of Rangitoto Pa superimposed on google earth image. Note the sketch is not to scale and so the northern most terraces need adjusting to the north and east to fit the land.

Grass Fig. 3: possible vegetation boundary proposal over google earth 2020 image. This is a starting point for a proper vegetation management document.

Fig. 4: Proposed boundary of the area to have weed species removed and re-grassed (inside the green polygon). The green polygon is overlaid over the 1986 Maingay archaeological plan and this in turn has been overlaid over the 1950 aerial photo that clearly shows archaeological features of the pa.

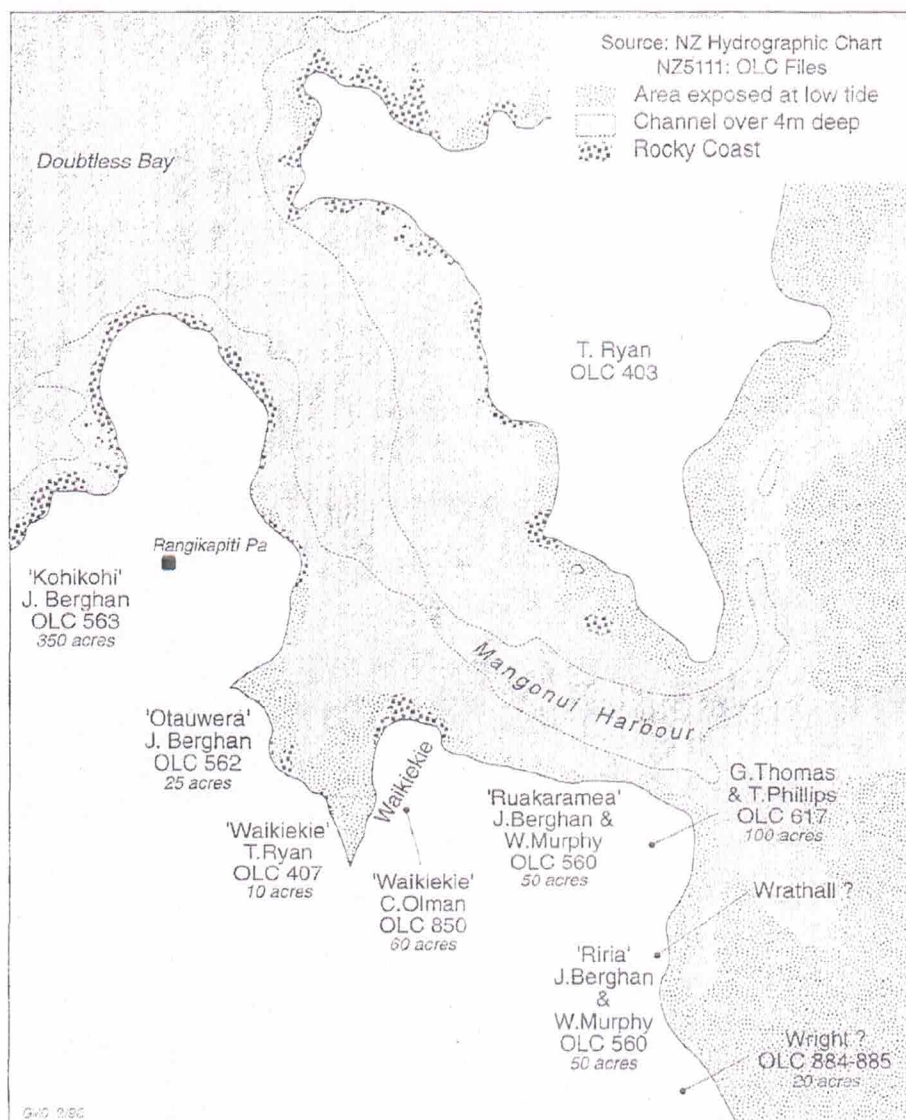

Figure 29: Mangonui, circa 1840

14.1.2 Thomas Ryan (OLC 403-407; Doc D5, p 1160)

Old land claim 407 'Wykeke' (Waikiekie) 21 June 1838 – 10 acres:

bounded on the north by a small Bay on the east by land belonging to Charles Holman [sic] and on the south and west by land belonging to James Berghan and Thomas Ryan.

Annexure C

Archaeological Sites "in the vicinity" of Sites owned by Zejia Hu and Ian Palmer on Rangitoto Peninsula (as advised by Heritage NZ per letter dated March 29th, 2016)

Count	NZAA ID		Location		On our property?	In our fenced off bush areas?	Reports?	Comments	
1	O04/58	Disturbed terraces and midden	SW corner of:	Lot 1, DP322506	yes	No	Aug 2006 Assessment & Apr 2008 Field Report and Aug 2007 Historic Places Trust authority to disturb Re RC 2080541	Aug 2006: "site is considered to be of relatively low significance"	Apr 2008: "This present archaeological assessment reconfirms the status of the statement and further notes that the midden to be affected by the intended earthworks is a secondary deposition with a suspect provenance, although it probably originates from previous earthworks relating to the earlier farm track higher up the slope."
2	O04/69	pits	Nth end of:	Lot 2, DP391076	yes	No			
3	O04/447	midden	Foreshore bank in front of Stone cottage:	Lot 1, DP50149	No	n/a
