Introduction, Objectives and Method

Introduction

The Far North District Council has an ongoing need to measure how satisfied residents are with resources, facilities and services provided by the Council, and to prioritise improvement opportunities that will be valued by the community. Key Research has developed a comprehensive mechanism for providing this service.

Research Objectives

- To provide a robust measure of satisfaction with Council's performance in relation to services and Council assets
- To determine performance drivers and assist Council to identify the best opportunities to further improve satisfaction
- To measure how Council's reputation is evaluated by its residents
- To assess changes in satisfaction over time and measure progress against the Long-Term Plan

Method

- The methodology involves a quarterly postal to online survey measuring the performance of the Far North District Council, together with quarterly reporting of progress.
- The questionnaire was mostly carried over from the 2021 survey with a few refinements made in consultation with the Far North District Council. It is structured to provide a comprehensive set of measures relating to core activities, services and infrastructure, as well as to provide a wider perspective of performance.
- A total sample size of n=618 was achieved with data collected over four periods; from 3 November 2021 to 7 December 2022, from 19 January 2022 to 22 February 2022, from 16 March 2022 to 19 April 2022, and from 11 May 2022 to 14 June 2022.
- Data collection was managed to achieve defined quota targets based on age, gender, ward and ethnicity. Post data collection the sample has been weighted so it is exactly representative of key population demographics based on the 2018 Census.
- At an aggregate level the survey has an expected 95% confidence interval (margin of error) of +/-3.92%.
- There are instances where the sum of the whole number score varies by one point relative to the aggregate score due to rounding.

Notes

Due to rounding, percentages may add to just over or under (+/- 1%) totals.

Executive Summary (background)

2022 has been a challenging year for most territorial authorities. For Far North District Council there are several points that need to be taken into consideration when viewing the results:

1. The Omicron outbreak has impacted Council’s services across the district. Staffing shortages (both Council staff and contractors) affected delivery across services such as (but not limited to) requests for services (for example, front of house enquiries and animal control), roading maintenance and rubbish collection.
2. Vaccine mandates and different alert level / traffic lights system that limited residents capabilities to avail of Council’s services and facilities.
3. Most Council’s across New Zealand that we conduct Annual Residents’ Satisfaction surveys for have recorded decreases in overall satisfaction, perceptions of services and facilities as well as image and reputation measures.

Executive Summary (results)

- Opportunities to improve residents’ perceptions of Council’s performance overall are:
 - **Annual rates being fair and reasonable.** The perception of value for money provided of the rates paid continues to decline and since 2020 has declined by 12 percentage points. *Annual property rates being fair and reasonable* have especially low satisfaction among those residing in Te Hiku and Bay of Islands-Whangaroa wards. Some residents questioned whether they receive services they expect (such as rubbish collection) and whether rates are managed appropriately across all areas of Council’s service.
 - **Roads, footpaths and walkways.** Satisfaction has significantly decreased year on year across all areas related to the roading infrastructure. When residents were asked about the priority that Council needs to focus on over the next 12 months, 71% have mentioned *Roading*.
 - **Reputation.** Most residents (77%) are Sceptics and as such will show little support or approval, of the decisions the Council makes. Improving perceptions of trust, leadership, financial management or quality of services is necessary to improve the perception with overall performance, as this area has the greatest impact on overall satisfaction with the Council.

Overall Satisfaction

Overall performance

- Satisfaction with the *Overall performance of the Far North District Council* (everything considered; reputation, services and facilities, and value for money) remains at the same level when compared with 2021.
- Proportions of dissatisfied residents significantly increased year-on-year (25%) for *Overall quality of services and facilities* (37%) and satisfaction that *Rates provide value for money* (51%). The decline is influenced by the shift of perception among residents of Bay of Islands-Whangaroa ward.

NOTES:

Drivers of Overall Satisfaction

Overview

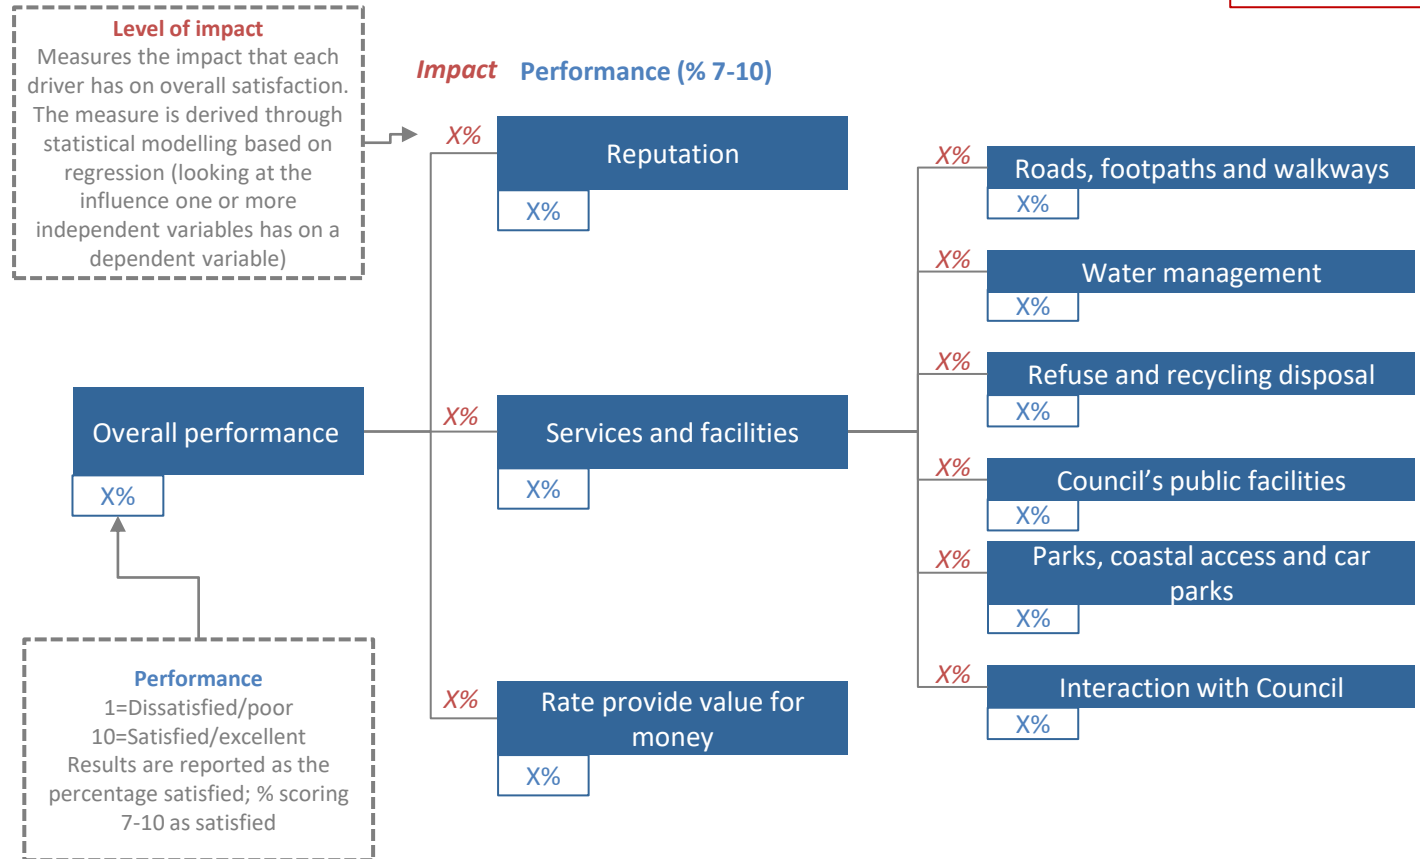

- A Customer Value Management framework was used to determine how the various reputation, service and value elements impact residents’ overall evaluation of Council

Introduction to the CVM driver model

Illustration

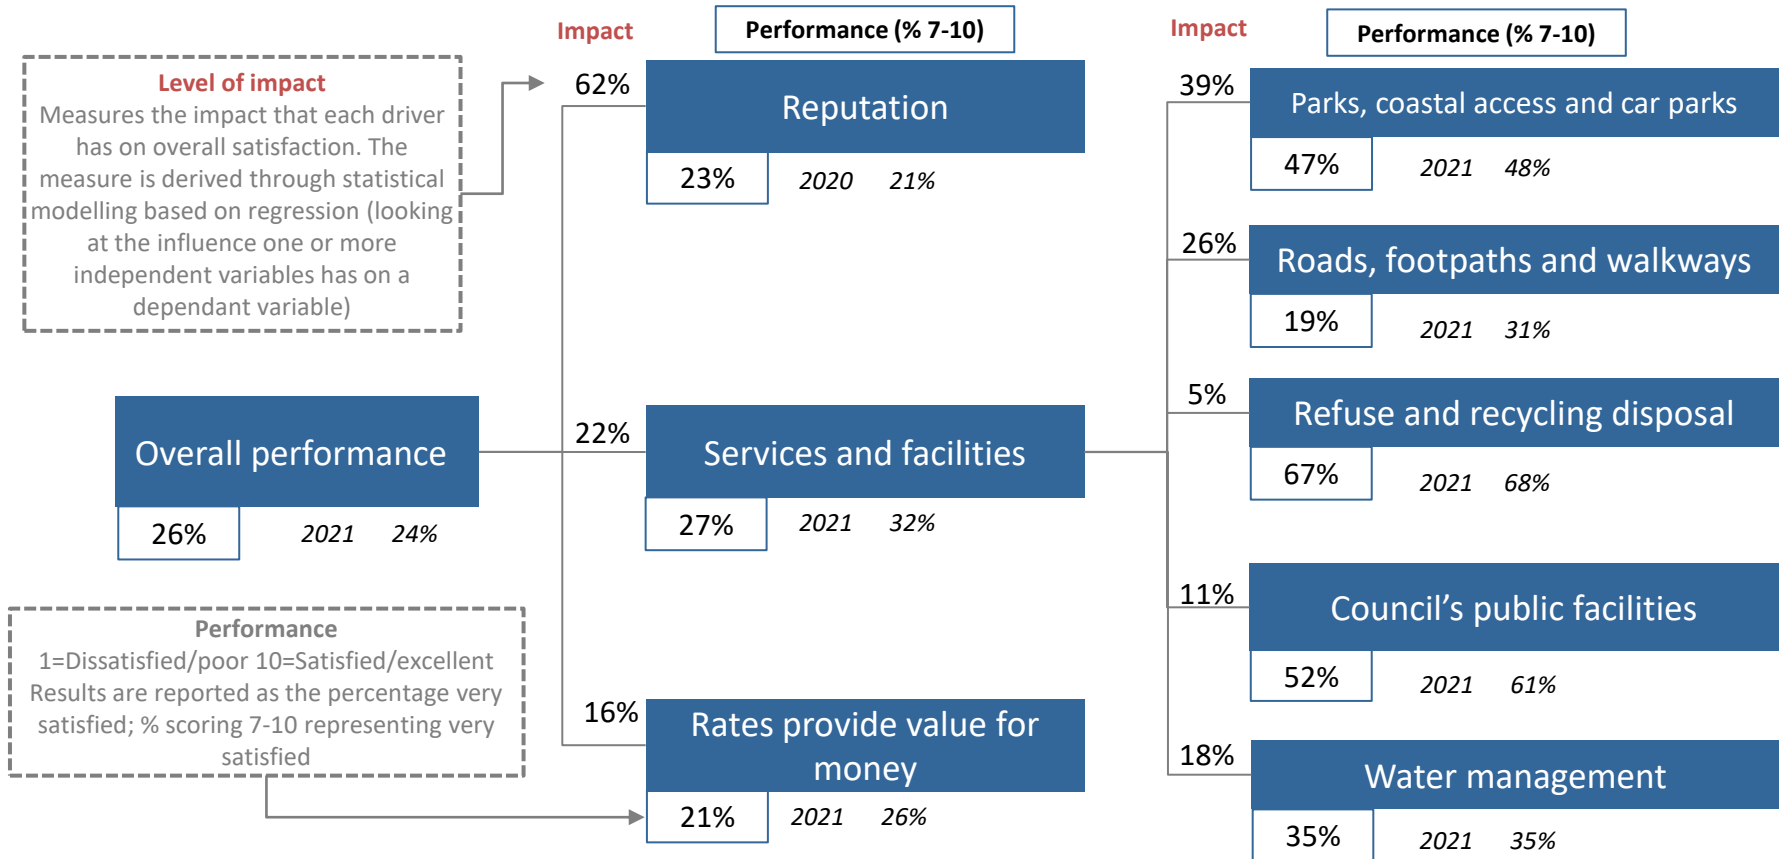

Overview of our driver model

- Residents are asked to rate their perceptions of Council’s performance on the various elements that impact overall satisfaction with public services, facilities and activities that Council provides
- Rather than asking residents what is important, we use statistics to derive the impact each element has on the overall perceptions of Council’s performance

- The Customer Value Management (CVM) model is a tool to understand perceptions of Council and a mechanism for prioritising improvement opportunities

Overall performance

- Reputation had the greatest impact on Overall performance (62%), followed by Rates providing value for money (16%) and Services and facilities (22%) with similar levels of impact. Parks, coastal access and car parks had the greatest impact on perceptions of Services and facilities, followed by Roads, footpaths and walkways.

NOTES:
1. Sample: 2022 n=618; 2021 n=501
2. nci = no current impact

Driver analysis: Overall level drivers

- Reputation had the greatest impact on Overall performance.
- It remains the highest impact across three main drivers. Performance remains consistent over the 12 months across all three wards, slide declines in perception of Services and facilities and Value for money are impacted by the decline in satisfaction among Bay of Islands-Whangaroa residents.

1. Total sample: 2020 n=501; 2021 n=501; 2022 n=618; Te Hiku n=177, Bay of Islands-Whangaroa n=331, Kaikohe-Hokianga n=110; Excludes 'don't know'

Driver analysis: Reputation

- Overall services quality has the greatest impact on perceptions of Council's Reputation and ratings continued to decline over the past 24 months.
- Lower ratings regarding Financial management and Vision and leadership were evident across all three Council wards.

NOTES:

1. Total sample: 2020 n=501; 2021 n=501; 2022 n=618; Te Hiku n=177, Bay of Islands-Whangaroa n=331, Kaikohe-Hokianga n=110; Excludes 'don't know'

5. REP4. And thinking about all the services, facilities and infrastructure Council provides, how would you rate them for the quality of what they provide the district?
6. REP5. So considering leadership, trust, financial management and quality of services provided, how would you rate Council for its overall reputation?

Driver analysis: Services and facilities

- Parks, coastal access and car parks were the most impactful service on perceptions of Overall services and facilities.
- Roads, footpaths and walkways had the second greatest impact on perceptions regarding Overall services and facilities. Satisfaction with this area is the lowest and has showed a large decline over the past 12 months. This area presents best opportunity for Council to focus on over the next year.

Weighting

The sample structure target was set broadly in line with known population distributions and was weighted post survey so as to be exactly representative of the known population distributions according to the 2018 Census. This represents 'best practice' in research and means that inferences made about the population will then be reliable, within the confidence limits.
